### Introduction

MacAppStuff Shut Down provides you with the ability to shutdown, restart, sleep or log off your Mac at specific times on specific days.

For convenience the application can be run automatically when your Mac starts (check the option “Add this application to your log-in items” – see Preferences – Options in this manual).

When you run the application it resides in your menu bar. In the screenshot below you can see the application's red shut down icon (far left):

Click the icon for access to the application's menu:

Clicking "Preferences" will display a window where you can configure some options or set schedules for shutting down, restarting, sleeping or logging off. Both are discussed later in this manual.

Selecting one of the top four menu items (Shut down, Restart, Sleep and Log off) will cause your Mac to shut down etc. The action will have immediate effect UNLESS you have checked the option "Show confirmation dialog when shutting down via menu" in Preferences.

Remember to save any work before you sanction a shut down (etc), or when a scheduled shut down (etc) is due.

## Options

### **Add this application to your log-in items**

When checked, the application will start when you start your Mac.

### Show this window when application starts

When checked, shows the above window whenever the application is run.

### Show confirmation dialog when shutting down via schedule

When you configure a shut down (etc) from the Schedule panel, this option (when checked) will display a confirmation dialog for you to sanction or refuse the action. Otherwise, the action occurs immediately. You can configure how this dialog appears and acts:

#### **Play a beep when showing confirmation dialog & Beep every 3 seconds**

Does exactly as it says. This will, hopefully, get your attention if you are away from your Mac.

**Automatically close dialog after x minutes and x seconds**

The dialog will close automatically, and enforce the action (shut down etc), after the specified period of time. You can enter values of 0-59 for minutes and 1-59 for seconds.

The countdown is displayed on the dialog.

**Cancel dialog if mouse moved**

Will automatically close the dialog, and abort the action (shut down etc), if you move your mouse. This feature can be used to tell the application “no, don’t shut down I’m still using my Mac”.

**Prevent cancellation of dialog**

This prevents you (or anyone else) from cancelling the confirmation dialog. Use this with caution!

**Show confirmation dialog when shutting down via menu**

Displays a confirmation dialog when you manually select a shut down method from the application’s menu.

**Energy Saver**

This button open’s the preference pane for the operating system’s Energy Saver settings.

## Schedule

This is the heart of the application, where you specify on what days and at what time you want your Mac to shut down, restart, sleep or log off.

- Every day of the week at a specific time.
- Every weekend at a specific time.
- Every weekday at a specific time.
- Any day at a specific time.
- On a specific date at a specific time.

Simply check the desired day(s) and select the action and the time. “Use today’s time” and “Use today’s date” will set the relative values of any checked days. “Copy to others” will copy the action and time values for Sunday to the days below it.

“Change value of highlighted field” will alter the values for the date and time edit boxes.

## Trial Limitations

The trial is designed to run for 14 days. After this time you will either need to purchase a license from our website (see below), or remove it from your computer. The “Cancel dialog” and “Prevent cancellation” options are disabled in the trial.

## How to buy

If you are truly satisfied with the software and have fully evaluated it for 14 days, you can purchase a license online from our website (go to the product page and click the Buy button).

PayPal handle our payments. You need a working email address to purchase the software. Once you have made your purchase, you will receive an email from PayPal confirming the transaction, and an email from us (usually within 24 - 48 hours) which will include you're your license and a download link to the software.

Your license becomes void if it is used by someone else to activate the software, if a refund is issued or your payment is fraudulent.

Our website (<http://www.macappstuff.com/help.aspx>) contains full details regarding licenses.

## License Agreement

MacAppStuff grants the customer a non-exclusive and non-transferable license to use MacAppStuff Shut Down™ (the "software") as long as the customer complies with the terms of this agreement. With a single-computer license you may use one (1) copy of the software on one computer. A multi-computer license may be purchased to allow the software to be used on more than one computer.

The MacAppStuff Shut Down documentation and the software are copyrighted and all rights are reserved. The software and documentation are subject to change without notice. The software and documentation may not, in whole or in part, be copied, photocopied or reproduced without written consent from MacAppStuff, although you may make copies of the software for backup purposes only. You may not loan, rent or license the software or the documentation.

## Limited Warranty

MacAppStuff makes no warranties, either express or implied, that the software will meet your requirements, that operation of the software will be uninterrupted or error free, or that all software errors will be corrected. In no event will MacAppStuff or the author be liable for direct, indirect, special, incidental, or consequential damages resulting from any defect in the software or manuals, even if they have been advised of the possibility of such damages.
