

## UPDATES LIST

Date            Release

08-11-2012 V 2.0.1

I fixed some errors with the cut, copy and paste  
I added a pop-up menu with the cut, copy and paste code  
I changed the colors.

25-10-2012 V 2.0.0

I added more solutions to the list  
I fixed some errors

03-10-2012 V1.9.9DEMO (Beta)

Was added the ability to calculate solutions with more than one compound (up to 3 compounds for the demo version).  
Was added a list of the most commonly used solutions (Limitations for demo version)  
I modified the aesthetics  
I fixed some errors

22-08-2012    V-1.5.0

I added the option of Purity for calculations that involve solid compounds.  
I modified a little the aesthetics.  
I fixed minor errors.

08/06/2012    V-1.4.0

The program check for updates at startup  
I added the calculation of initial concentration.  
I adjust the presentation of results  
I changed the names of temporary files:  
    zoluto\_print.txt: Stores the last print.  
    zoluto\_idiom.txt: Current language.  
    zoluto\_listaDeCompuesto.txt: keeps lists of compounds in use  
    zoluto\_Check\_Update.txt: enables or disables the automatic update check  
    zoluto\_path\_seting.txt: saves the path to the last folder used.  
I fixed minor errors.

24/07/2012    V-1.3.0

It is possible to import compounds lists from other users and mix its with our lists of compounds.  
I added the units of concentration mg/dL and mL/dL (% weight /volume and % volume/volume) to perform calculate.  
I improved the function of printing results.  
I added on-line help (it need an Internet connection).  
I added the ability to query for new updates (it need an Internet connection).  
There were minor cosmetic changes.

I fixed some errors.

06/07/2012 V-1.2.0

It was incorporated the parameter "moles" to perform calculations.

I fixed calculation algorithms.

There were minor cosmetic changes.

Note: the files. "Zol" are incompatible with previous versions of the program.

05/01/2012 V-1.1.1

Improved printing function.

There were minor cosmetic changes.

30/05/2012 V-1.1.0

You can import and export the list of compounds.

Were added the module language English / Spanish.

Fixed some errors.

5/13/2012 V-1.0.0

The list of compounds is sorted alphabetically.

The file "listaDeCompuestos.txt" can be edited using a plain text editor without using the program.

You just have to follow the format in which data are entered.

11/05/2012 V-0.9.5.5

We implemented all functions of copy, cut and paste.

It also added the ability to drag selected text from a text area to another.

05/10/2012 V-0.9.5

Added a function to change the font to Bold type.

Were activated Cut and Copy buttons (for now to paste using the keyboard: Ctrl + V

There were minor cosmetic changes.

07/05/2012 V-0.9.0

It improves the function of print.

It lets you add and remove compounds from a dropdown list. This list is automatically saved and loaded at startup.

There were minor cosmetic changes.

19/04/2012 V-0.8.3

Added the function to print the contents of the text area "Result"
